Troubleshooting Tips

- If you sometimes get a spinning wheel or a white blank page, try these first:
 - Go into your settings or preferences and find “pop-ups” and indicate “allow pop-ups”. On the right side of your browser bar, you may also see an icon with a red x indicating you have pop ups. You can “allow pop ups” there as well.
 - Clear your browser history by going to the browser settings and clicking into “clear browsing data”. On some computers, you can also do it by clicking into the three bars on the far right and then opening up the history link. Once there, clear your browsing data.
